Project Overview

10 October 2026 | playerP2

Purpose

playerP2 is a Windows desktop media player built with C++/CLI, Windows Forms and libmpv. It plays local audio and video files and provides playlist and playback controls.

Features

- Add local files and play a selected playlist item.
- Play, pause, stop, seek and adjust volume.
- Move to the previous or next file; advance automatically when a file finishes.
- Use Shuffle, Repeat Off, Repeat All or Repeat One.
- Watch video in full screen with an auto-hiding control bar.
- Switch audio tracks and toggle a centre-channel vocal-reduction filter.
- Control playback using keyboard shortcuts.

Technical overview

Component	Technology / role
User interface	C++/CLI Windows Forms
Playback	libmpv (libmpv-2.dll at runtime)
Development	Visual Studio 2026; .NET Framework 4.7.2
Target	Windows x64
Main application	MpvPlayerForm
Full-screen controls	FullScreenOverlay
Media entry	MediaItem

Current state

Release x64 builds successfully. Playback and the main controls were exercised on the reorganised project. The Windows Forms Designer also opened successfully after a syntax correction.

Remaining work

- Investigate linker warning LNK4248 involving mpv_handle.
- Complete recorded regression tests and validate packaging on another Windows PC.
- Review third-party licences before distributing a binary.
