Software Requirements Specification

10 October 2026 | playerP2

Scope

The application plays files selected by a local Windows user. Online streaming, accounts, cloud syncing and mobile support are outside the current scope.

Functional requirements

ID	Requirement
FR-01	Add local audio or video files to a playlist.
FR-02	Play, pause, resume and stop the selected file.
FR-03	Seek by progress bar or ten-second skip controls.
FR-04	Adjust volume from normal and full-screen views.
FR-05	Select previous/next; automatically advance after natural playback completion.
FR-06	Support Repeat Off, All and One.
FR-07	Shuffle playlist playback without repeating an item within a cycle.
FR-08	Toggle vocal reduction and select available audio tracks.
FR-09	Enter or exit full screen, with an auto-hiding playback overlay.
FR-10	Support keyboard shortcuts for common playback actions.
FR-11	Stop must not cause automatic playback of the next item.

Non-functional requirements

ID	Requirement
NFR-01	Build for Windows x64 with the documented compiler and dependencies.
NFR-02	Keep video aspect ratio when maximised or full screen.
NFR-03	Remain usable at 150% Windows display scaling.
NFR-04	Keep playback state consistent across normal and full-screen controls.
NFR-05	Handle empty playlists and invalid media without crashes or endless skipping.
NFR-06	Provide required runtime libraries and licence notices with distributions.

Acceptance criteria

Each requirement must be checked against the compiled Release x64 application. Record observed behaviour, expected behaviour and pass/fail results in the test report.
