Testing and Evaluation

10 October 2026 | playerP2

Recorded results

Item	Result
Release x64 rebuild	Passed: 1 succeeded, 0 failed.
Application launch	Passed on the development Windows laptop.
Playback and interface	Main features tested successfully by the user.
Windows Forms Designer	Opened successfully after the CodeDOM syntax fix.
Linker warning	LNK4248 (mpv_handle) remains unresolved.

Regression test cases

Test	Expected result
T01 Load an MP3 and MP4	Both play with appropriate audio/video.
T02 Pause, resume and Stop	State changes correctly; Stop does not autoplay.
T03 Previous, Next and autoplay	Correct playlist item begins.
T04 Repeat Off, All, One	Each mode follows its selected rule.
T05 Shuffle with Repeat All	No duplicate in a cycle; a new cycle starts.
T06 Seek and progress slider	Playback position follows the control.
T07 Volume 0%, 50%, 100%	0% is silent; endpoints align with the slider.
T08 Full screen and Esc	Controls display, hide and restore correctly.
T09 Keyboard shortcuts	Space, arrows, N, P, F and Esc operate correctly.

Test	Expected result
T10 Vocal reduction and Track	Filter toggles; audio tracks change when available.
T11 Empty playlist and invalid file	No crash or infinite skip cycle.

Evaluation notes

Recorded tests cover the working build and manual feature checks. They do not establish automated test coverage or compatibility with other Windows computers. Keep screenshots and logs for final release testing.

Outstanding checks

- Investigate the LNK4248 warning and repeated debugger exceptions.
- Test a portable package on a Windows computer without Visual Studio.
- Confirm all third-party licence requirements.
